INCREDIBLE TECH
Investors guide to Ukrainian IT
Ukraine is a country of creative and talented people, of ideas that come to reality within days, and where the newest technologies are born today.

The IT sector has always been one of the key priorities for the Ministry of Digital Transformation. Now it's one of the key priorities for the entire country.

As it proved to be the most resilient during the full-scale Russian invasion, today our country is already the best test ground for all the newest technologies. We are especially betting on developing defense tech solutions that will let our country win and defend our freedom and democracy.

Ukraine is proud to be a homeland for hundreds well-known IT companies and startups, which managed to develop & scale even in war time conditions, during blackouts and missile attacks. I encourage to support Ukrainian tech industry, by investing in our people & products they create — you invest in future of free democratic world.

The Information Technology (IT) industry stands as one of Ukraine's most youthful and thriving sectors, persistently advancing even amidst the challenging backdrop of wartime. With a proactive stance in adopting novel approaches and cutting-edge technologies, it plays a pivotal role in developing talents and moving forward groundbreaking products.

We take great pleasure in introducing a catalog showcasing Ukrainian IT companies and their innovative products. This catalog serves as compelling evidence that Ukraine's technology landscape has a profound impact on reshaping the global landscape, and influencing how the world works, communicates, and innovates.

This collaborative endeavor has been realized through the mutual efforts of the Ministry of Digital Transformation, the IT Ukraine Association and the TopLead Agency. The IT Ukraine Association stands as the foremost national association of IT companies, representing the interests of over 85,000 IT experts. It passionately advocates for the alignment of business, governmental, and international stakeholders in boosting the technological industry's growth within Ukraine.
Tap.
Click.

The fact is that behind the millions of buttons and millions of customers who are clicking on smartphones worldwide today is a product or IT infrastructure created by Ukrainian engineers and entrepreneurs.

Which solutions exactly were built by the incredible minds of the Ukrainian people? Well, you can find them in this catalog.

Trust me, it is quite possible that the navigation software that guides you in your car was created or maintained by teams from Ukraine.

And many other technologies or applications are helping our army liberate the land right now.

Ukrainian IT is truly incredible. You can find it on your next tap or click right after reading this guide.

Enjoy!

Investing in new technologies is one of the strategic areas of UKRSIBBANK BNP Paribas Group activities.

Ukrainian IT is one of the world leaders in scale and development, and growth pace. We are firmly convinced that the support of Ukrainian IT significantly contributes to the development of the global IT market and the creation of modern products and tech solutions.

Ukraine is already well-known in the world as an IT hub where talented, dedicated and highly professional engineers work; they create unique projects supported by UKRSIBBANK BNP Paribas Group. In our digital world, where technological progress is rapidly evolving, cooperation with experienced IT companies is critical to success. They help to improve business processes, ensure data security, develop innovative solutions, and implement digital transformation strategies.

By investing in Ukraine now, you are investing in the future.
ABOUT THE PROJECT

Ukrainian IT has developed rapidly and has become Ukraine’s second-largest export industry. Ukrainian products and companies can be found all over the world. Some of them have become so large and globally recognized. Yet, only a few people know where these companies are from or who the developers of these products are.

That’s why we created Incredible Tech, an effective tool for promoting Ukraine’s IT industry internationally.

It is a tool for raising awareness of Ukrainian IT capabilities, attracting investment to the industry, and helping existing IT businesses scale up.

Incredible Tech is a list of excellent and promising Ukrainian IT products and companies divided by industry verticals. You can find among them both small but up-and-coming companies and huge tech companies whose products are used by millions of people and businesses worldwide.
IT INDUSTRY IN UKRAINE
PLACE OF THE IT INDUSTRY IN UKRAINE'S ECONOMY

Ukraine's IT industry is rapidly developing. It is export-oriented and accounts for almost half of Ukraine's service exports and nearly 5% of GDP. The IT industry has grown 18.2 times since 2010 and ranks second among other export-oriented sectors.

LIST OF INCREDIBLE TECH
METHODOLOGY

Incredible Tech is a list of excellent and promising Ukrainian IT products and IT companies by industry verticals. Ukrainian IT includes over 2,300 companies, and we have selected only the most remarkable and promising.

Which companies made it to the list?

1. The company is **Ukrainian and positions itself as Ukrainian**. That is, it meets at least two criteria from the list:
   - Ukrainian registration
   - Ukrainian founder
   - Ukrainian origin
   - Head office or representative office in Ukraine

2. The company **belongs to the IT industry**, i.e., it engages in one or more of qualified activities:
   - Cloud data centers
   - Cybersecurity
   - UAV design, production, maintenance and repair, and/or control training services
   - Technological products in defense, industrial, or domestic sectors
   - Developing, implementing, and/or supporting products for international card payment systems
   - Digital marketing and ads using software developed by residents
   - eSports
   - Publishing and distributing software, in particular, SaaS
   - R&D in IT and telecom
   - Robotics
   - Software development and testing, including GameDev
   - Supplying services related to the circulation of virtual assets
   - Training in computer literacy, programming, testing, and/or technical support of software

3. The company is **economically active**, i.e., continues to operate in Ukraine and/or abroad, and received revenue from selling products/services in 2023.

4. The company has a **landmark product or outstanding product development expertise**.

5. The company has **experience in exporting**.

6. The company is **recognizable to the audience**, active in communication, appears in the media, and promotes its brand.

7. The company has been reviewed and approved by an independent **Expert Council**. The Council was explicitly created to verify companies for this project. It included representatives from the Ministry of Digital Transformation of Ukraine, founders and CEOs of tech companies, and investors.
EXPERT COUNCIL

Dmytro Gryn
CEO at Jooble, Job Aggregator

Sasha Yatsenko
Principal at SMOK Ventures, Chairman of the Board at Techosystem

Oleksandr Yaroshenko
Head of Strategy & Investments at Headway

Igor Valenkevich
CIO at Rozetka.UA

Dmytro Vartanian
Managing General Partner at SID Venture Partners
LEGAL TIPS FOR INVESTORS IN UKRAINIAN IT COMPANIES

Rather international
A Ukrainian IT business typically operates with development centers in Ukraine, while registering front offices and holdings in the EU, USA, or other states.

NCA
Non-compete commitments by staff are generally unenforceable outside of Diia City.

No employees
Engaging independent contractors instead of employees is a common practice in the Ukrainian IT sector.

Venture tools
Convertible loans, options, and SHA are legally recognized in Ukraine but often require unanimous consent from all shareholders and other preparatory measures. SAFE are applicable only to Ukrainian legal entities that are already established.

IP paperwork
IT companies require IP assignment agreements and extensive paperwork to establish their IP rights for works-for-hire created before 2023.

Currency control
Ukraine has imposed currency limitation during the periods of Martial Law, which encompass restrictions on loan repayments and dividend distribution abroad.

Aequo law firm
We have proven expertise in all aspects of transactions. What sets us apart is our strong capability in English law and deep understanding of the tech industry.

On acquisitions of Ukrainian IT companies, Aequo has advised notable clients Apax Partners, BlaBlaCar, DEG (KfW Group), Dragon Capital, George Soros’s Ukrainian Redevelopment Fund, Intel, Iron Mountain, Kayne Partners Fund, Onit, Naspers, NetApp and Virtuozzo.

What we do
- Legal due diligence
- Management buy-outs
- Merger clearance
- Private equity transactions
- M&A and business transfers
- Strategic partnership, joint venture, restructuring, and carve-out
- Establishing R&D offices

Need legal advice or assistance?

Software architects: Mercedes-Benz previews its operating system MB.OS

Mercedes-Benz is developing its own operating system MB.OS, which will be introduced mid-decade with the new MMA platform (Mercedes Modular Architecture). MB.OS is designed and developed in-house with input from the world’s top IT professionals to retain full control over the customer relationship, ensure data privacy, and to leverage the unique integration of all car functions.

Based on a purpose-built chip-to-cloud architecture, MB.OS benefits from full access to all vehicle domains:

- infotainment;
- automated driving;
- body & comfort;
- driving & charging.

This strategic approach allows the world’s most valuable luxury automotive brand to offer its customers a differentiated, superior product experience.

AGTECH & FOODTECH
FarmingOS is a platform for managing the economy of an agricultural business. The program allows agricultural enterprises to be at the forefront of technological progress by providing them with access to powerful management and decision-making tools.

Company: Studio of agricultural system (SAS)

Why is this product incredible?
FarmingOS is the world's first platform that combines analysis, forecasting, and visualization of an agricultural enterprise's economic performance.

Top benefits of the product
1. Automated economic accounting.
2. Analytics and forecasting.
3. Centralised management.
AgriChain LLC is a Ukrainian IT-tech vendor. We specialize in developing and implementing software in agro. We created a one-named multi-product platform AgriChain. Today AC Platform includes 8 cross-functional products, each one solving business and operational problems in different agrofirms.

**Why is this company incredible?**
AgriChain has a special product development approach. Each product is a start-up. AgriChain has hard skills and tech expertise to provide full-cycle automatization of business processes.

---

Choice offers a wide range of services, which covers all the channels that a restaurant needs to communicate with their guests: a digital menu, a website for pick up and delivery, table reservations, QR payments, table ordering, and much more.

**Why is this company incredible?**
Choice is a complete online restaurant solution that helps restaurants increase their online visibility, bring in direct orders without commission, and work with customer retention.

---

FieldBee products enable growers to farm profitably and sustainably globally. Our solutions help agriculture machinery and robot developers with autonomous navigation. We provide accessible intelligence and machine automation for high-quality fieldwork on every farm and under all conditions.

**Why is this company incredible?**
FieldBee use machine learning, high precision, and software technology to make a more efficient, profitable, and sustainable future for all, not just for larger farms.
BUSINESS
PRODUCTIVITY
SOFTWARE
Reply.io is an all-in-one sales engagement platform that leverages AI and B2B contact and company data to help businesses find leads, engage with them through multiple channels, and scale up opportunities. Reply.io optimises users’ sales outreach process and enhances their productivity. One of the Top 50 Sales Products for 2023 on G2.

Company: Reply.io

Why is this product incredible?

Reply.io was one of the first in the market to believe in the potential of AI and added an AI qualifier for email quality and categorization of responses. The AI helped users improve their emails in real-time. Reply.io was also the first to integrate ChatGPT.

Top benefits of the product

2. Multichannel Sequences with in record number of communication channels.
BUSINESS PRODUCTIVITY SOFTWARE

Uspacy is an online service and a single workspace with modern tools for managing the critical daily processes of small and medium-sized companies: modern team communication, collaborations, tasks, and CRM. Open API (Application Programming Interface) and modern technological approaches allow you to easily integrate the online service with other systems.

Company: Uspacy

Why is this product incredible?

Uspacy is an all-in-one online service with modern business management tools. For the first half year of operation, 2,400 businesses have joined Uspacy. Present worldwide, available on domains .ua, .pl, .com.br, .com and .eu.

Top benefits of the product

1. Set of online tools in one service, not separate products.
2. Built on a modern API-based architecture.

The convenient CRM system of Uspacy manages daily processes and controls client interaction. System contains:
- CRM to schedule activities
- CRM for work with a client base
- CRM to control the work of managers
- CRM for sales

We help organize lively communication between employees using newsfeeds, personal profiles, private and group chats.

Uspacy tasks help effectively distribute resources of all members of the work process and control compliance with deadlines. Create and manage tasks. Increase interaction by discussing stages of work and by specifying details directly in the task cards using comments and notes.

A complete platform for communication of employees is available in iOS and Android apps. Stay in touch with your colleagues wherever you are.
### Awesomic

SOC Prime equips every security professional with a collective cyber defense platform to act faster than attackers. SOC Prime's innovation, backed by the vendor-agnostic and zero-trust cybersecurity approach, and cutting-edge technology leveraging Sigma language and MITRE ATT&CK® as core pillars are recognized by independent research companies and credited by the leading SIEM, XDR & MDR vendors.

Company: SOC Prime

Why is this product incredible?
SOC Prime operates the world's largest and most advanced platform for collective cyber defense that cultivates collaboration from a global cybersecurity community and curates the most up-to-date Sigma rules compatible with over 27 SIEM, EDR, and XDR platforms.

Top benefits of the product
1. Data audit performed in less than 300 seconds.
2. Industry-largest detection content library.

SaaS platform consists of 3 products:
- SOC Prime's Attack Detective connects real-time attack surface visibility and existing security data with prioritized detection content, MITRE ATT&CK, and CTI to enable dynamic data orchestration and risk-optimise the organization's cybersecurity posture.
- Uncoder AI is the dedicated IDE for Detection Engineering, which unlocks the power of augmented intelligence and collective industry expertise to enable SOC teams seamlessly code, validate, and share detection ideas using Sigma and MITRE ATT&CK as code assistants.
- SOC Prime's Threat Detection Marketplace (TDM) empowers cyber defenders with access to a global security newsfeed, tailored threat intelligence, and a curated Sigma rule repository continuously enriched with new detection ideas.
Hacken is a trusted blockchain security auditor on a mission to make Web3 safer. Established in 2017 with a team of 60+ certified engineers, it provides solutions covering all aspects of blockchain security, such as Smart Contract Audit, Blockchain Protocol Audit, Penetration Testing, and more.

**Why is this company incredible?**
A leading auditor of crypto exchanges, Hacken launched an accelerator platform for innovative startups focusing on cybersecurity.

ISSP provides complete cycle cybersecurity services and serves the cybersecurity needs of private and public sector organizations. The services cover all aspects of the cybersecurity lifecycle, from initial assessment to solutions development, implementation, monitoring, and ongoing management.

**Why is this company incredible?**
ISSP acted as the first responder to and investigator of many of the most sophisticated cyberattacks in history and was named by WIRED as “the go-to firm for victims of Ukraine’s cyberwar”.

Osavul is an AI-powered protection against information threats. The company develops an AI-powered software platform to protect states, businesses, and society from disinformation and information operations.

**Why is this company incredible?**
Osavul developed a unique AI-powered technology to track and analyze narratives in the information environment.
DEFENSE TECH
DEFENSETECH

SHARK UAV is an advanced multifunctional unmanned aerial system designed to perform a wide range of tasks. SHARK UAS offers the capability for fully autonomous reconnaissance, surveillance, precise identification, and recognition from a significant distance at high altitudes.

Company: UKRSPECSYSTEMS

Why is this product incredible?
Shark UAV is a comprehensive turnkey solution that addresses user needs from A to Z. SHARK-M UAS (military version) is currently on active service in the Ukrainian Army and has received positive feedback from Ukrainian Army officers, drone operators, and intelligence agents.

Top benefits of the product
1. Short lead time. Quick assembly - 2 person/30 min.
2. Resistance to EW.
3. Low operational cost.

Camera system: USG-231 - 30x optical and 3x digital zoom

Max ceiling: 3,000 m
Flight route: up to 300 km
MTOW: 12.5 kg

Average endurance: up to 4 hour
Communication range: up to 80 km

We have created an advanced software solution specifically designed for complete control and management of the Shark UAV. This software provides a flawless and intuitive interface for pilots of all skill levels, and it incorporates automated functions to optimise operations, improve efficiency, and reduce the risk of errors that can occur due to human factors.

Average endurance: up to 4 hour
Communication range: up to 80 km

Max ceiling: 3,000 m
Flight route: up to 300 km
MTOW: 12.5 kg

Company: UKRSPECSYSTEMS
Zvook is a network of acoustic sensors for detecting airborne objects. The network helps conventional air defense systems to detect and repel the enemy's low-altitude cruise missiles and drone attacks, warning the civilian population. Our neural nets are created by a highly experienced team — the folks who make production-grade synthetic voices for Disney and others in Hollywood.

Company: **ZVOOK**  
[www.zvook.tech/en](http://www.zvook.tech/en)  
[contact@zvook.tech](mailto:contact@zvook.tech)

**Why is this product incredible?**

Zvook technology is trained on a unique dataset of acoustic fingerprints for the most advanced Russian weaponry. During the last several Russian attacks, Zvook confirmed detections at distances of up to 10 km.

**Top benefits of the product**

1. Low false positive rate.
2. Passive work (not emitting) and low power consumption — up to 12w.
3. Can be trained to detect other types of targets.

**Our sensor not only discovers but also classifies various targets. Detection range:**

- Jet/Cruise missile: up to 10 km
- Helicopter: up to 10 km
- Propeller plane: up to 10 km
- Drone: ~250 m

Zvook is a weather protected parabolic antenna and a microcomputer that can run modern ML algorithms. Flexible and can be extended with additional sensors. We install these stations on cell towers for network access and power. All stations are connected into a secure network so that operators can monitor them overlaid on a map.
## Athlon Avia

Athlon Avia is a Ukrainian R&D and production company working in the field of military unmanned solutions, such as loitering munitions, ISTAR, and unmanned artillery fire adjustments aerial systems.

**Why is this company incredible?**

Company: Ministry of Digital Transformation, Diia Company

Why is this product incredible?
Diia is the first app in the world to offer an official digital passport. Diia started a trend of digitalization of public services in the world. Ukraine is now sharing its experience with other countries, for example, Estonia (mRiik).

Top benefits of the product
1. Documents have the same legal force as paper documents.
2. Diia does not store data, so user data is securely protected.
3. 14 digital documents and 25 public services.
HEALTHTECH
DrugCard provides full-regulatory compliant SaaS to help pharmacovigilance teams in pharma companies and CROs by trimming literature screening time and generating deeper insights about drug safety using sophisticated parsers and AI-tech. Having secured €500K from venture capitalists and with Google’s support, our trajectory is set towards 100 customers and a projected ARR of €1.0M by 2024.

Why is this product incredible?

Leveraging proprietary technology, DrugCard is one of the leaders in pharma regulation, drug safety, and software innovation. A platform supporting journals from 43+ countries and scanning medical literature across 100 languages.
**HEALTHTECH**

**Altris AI**

Altris AI develops software designed to improve the diagnostic process in ophthalmology. It creates a deep learning-trained algorithm for the automated detection of retina pathologies.

- **Why is this company incredible?**
  Altris AI is the first in the world in AI-powered detection of retina pathologies on OCT scans. The company detects the most significant number of retina pathologies globally.

**Aspichi**

Aspichi is a VR-based psychology trauma treatment system that is based on photorealistic 360 video, evidence-based protocols, and psycho-education programs. It allows the scale of psychological services to be fast and controlled, with an already proven track record.

- **Why is this company incredible?**
  A revolutionary solution that helps millions cope with their problems. It works at the intersection of VR and spatial video, allowing patients to move to a safe place.

**ComeBack Mobility**

ComeBack Mobility developed the Smart Crutch Tips IoT device that lets patients know how to apply the right amount of force to a recovering limb and provides remote therapy monitoring service for providers.

- **Why is this company incredible?**
  The medical startup raised the initial investment for the industry's first autonomous wireless device with a memory capacity that provides electronic communication with a doctor.
HEALTHTECH

Elomia Health
Elomia is an AI-powered mental health chatbot. It is anonymous, available 24/7, and covers people with all kinds of problems, from having a bad day to dealing with symptoms of severe conditions. Unlike other chatbots, conversation with Elomia feels like talking to an actual human.

Why is this company incredible?
The company owns the world’s most extensive commercial mental health dialogues, allowing it to implement generative AI.

Effy AI is an AI-powered 360 feedback and performance review software. It provides the fastest experience conducting employee reviews with ready-to-use templates and AI-generated reports. This HR tool fits best companies that are just starting to build review processes and those that conduct reviews occasionally. Thousands of employees appreciate the convenience of the system.

Company: Effy

**Top benefits of the product**

1. AI-generated reports.
2. Ready-to-use templates.
3. Usage-based pricing model.

**Why is this product incredible?**

Effy AI provides the fastest experience in conducting employee reviews. This HR platform is the most flexible in its class. Effy builds the best user experience for managers and teams.
HURMA is a professional and effective solution for automating recruiting, HR, and OKR, saving up to 43% of the time on routine and 18% of the recruiting budget. By choosing HURMA, you get a technological product with high data security, AI, and a convenient interface at a reasonable price.

Company: HURMA System

**Why is this product incredible?**

- HURMA is the first Ukrainian HRIS/ATS system with self-developed artificial intelligence and highest security standards. The platform has already crossed the threshold of 1K companies, and geography of clients includes 15+ countries.

**Top benefits of the product**

1. Unprecedented data security.
2. Integration with all popular job portals.
3. AI that powerfully speeds up the work of HR managers and recruiters.

**Key features of the HURMA System:**

- Automation of HR processes
- Recruitment Automation
- Managing performance, objectives, and key results
- Automation of feedback and polls
- HR analytics and statistics on company processes
- HR reporting in two clicks
- Service for onboarding
- Service for HR-self-service of employees
- Vacation and absence tracking
- Assets management software
- A single knowledge base for your company
- The best HRIS system for your success
CleverStaff automates all recruitment processes and reduces routine to a minimum. A built-in gamification system will speed up hiring processes by up to 42%. Tools and modules help to fill the most challenging IT vacancies. Fully GDPR compliant and guarantees 100% security.

Why is this company incredible?
CleverStaff became the first in the world to implement an innovative update — a built-in gamification system for the recruitment process.

djinni
Djinni.co is the largest tech talent marketplace in Eastern Europe, where tech companies from all over the world can connect directly with the top tech talent on the market.

Why is this company incredible?
The largest website in Ukraine for hiring tech talent and the most popular job search tool among Ukrainian developers. The company doesn’t charge monthly fees or prepayments.

Jooble is an international job search website millions of people in 67 countries use daily. Operating in the online recruitment market since 2006, Jooble is now among the top 10 global Jobs and Employment sites in terms of traffic, aggregating vacancies from over 140K+ resources in one place.

Why is this company incredible?
Jooble is among the most popular in job posting aggregation worldwide, and collects vacancies from more than 140,000 resources worldwide each day.
HR TECH

**PeopleForce**

PeopleForce is an all-in-one HR platform for the best employee experience. It is a centralized solution to streamline HR processes at every stage of the employee life cycle. Their mission is to help businesses to simplify HR processes and build a high-performance culture.

**Why is this company incredible?**

PROPTECH & CONSTRUCTION
Birb is an AI rental agent developed by LUN, the biggest PropTech company in Ukraine. Birb is an AI rental agent that picks the best-matching properties from all properties on the 3D map. Subscription for newly listed properties.

Company:
LUN

Why is this product incredible?
Birb is the revolutionary new way of renting: AI quickly finds the best-matching flat for customers.

Top benefits of the product
1. Aggregation: all properties on the market.
2. Mobility: fast fluent iOS app with 3D map.
3. Loved brand: 4.9/5 rating on the AppStore.
NewHomesMate is the marketplace for new construction homes, helping people find, compare, and buy new builds. It is a fast-growing startup that aims to revolutionize the process of buying new builds.

Why is this company incredible?
The first marketplace of newly built homes, while the $350B new construction homes market is overlooked by incumbents focusing mainly on resale and rent homes.

LUN is a Ukrainian IT company driven by innovation. Their core expertise is crafting PropTech platforms that redefine how people discover homes online. Since 2008, they have been at the forefront of revolutionizing the real estate sector.

Why is this company incredible?
The first to integrate AI technologies into their products back in 2015, LUN embraces cutting-edge advancements like drones and 3D models to create a unique home-searching experience.

Advisor SCADA has developed an all-in-one Building Management System to help property owners reduce energy expenses and efficiently manage a facility in one place.

Why is this company incredible?
The most significant competitive advantage is that Advisor’s BMS system is Low-Code and Plug-And-Play and can be easily integrated with various engineering equipment.
About a third of all IT companies in Ukraine are service companies. Among them are those which have long been global companies with thousands of employees and customers around the world. These companies have exceptional expertise and provide their services in various areas, from manufacturing to retail and entertainment.

### Why is this company incredible?
